

Discrete Quantum Models

Instituto de Física, Benemérita Universidad Autónoma de Puebla, México

November 22 - 25, 2016

Organizing Committee: Carlos Pineda, Emerson Sadurní

We shall focus on discrete quantum models with applications in solid state physics, optical lattices, etc. The meeting format is informal (focused on the sharing of ideas rather than presentation of ideas) so as to stimulate discussion and collaboration. Ample time will be available for individual work, social interactions, cultural exchange and recreation.
