

Young scientists grants

IUCr sponsorship permits the financial supporting to young scientists who have a crystallographic background preferently.

Young scientists are graduate students, post-graduate students or post-doctoral fellows with a maximum age of 30 (exceptionally 35).

Recipients of a young scientist grant are required to create an entry in the World Database of Crystallographers (if not already present) in the following address <http://wdc.iucr.org> and follow the link to "Create a new entry", filling in their professional details as fully as possible.
