Enrique Quiroga- González

Institute of Physics

Benemerita Universidad Autonoma de Puebla

I am pleased to inform you that your contribution "**Substrates of Si micropylramids decorated with Ag nanoparticles for SERS of viscous analytes**" by Karen Alejandra López-Castaños, Enrique Quiroga- González, Alia Méndez-Albores, has been **accepted** in symposium **B5, Nanofabrication of Multifunctional Hybrid Materials: Methods, Materials and Applications** at the 31st International Materials Research Congress, to be held in Cancun in August 13 - 18, 2023.

The presentation has been accepted in the **Poster Presentation** modality. Remember that in order to include your abstract in the congress program you must confirm your participation no later than May 26th by choosing the modality you will present your abstract(s); you can do this from your IMRC account.

Organizers of the Symposium

"Nanofabrication of Multifunctional Hybrid Materials: Methods, Materials and Applications"

José Enrique Martín Alfonso, José Fernando Rubio Valle, Gethzemani Mayeli Estrada Villegas, Margarita Sánchez Domínguez
